

5 quick, easy, and cheap things you can do yourself to give your house a new look!

Maybe you don't want to do a major remodeling project or just plain can't afford one right now. Here are 5 things you can do yourself that will give your house a totally new feel.

Paint

A fresh coat of paint can do wonders for any room. Virtually any room in your house can be primed and painted for around \$100 including paint and supplies.

In addition, painting worn out cabinets in kitchens or bathrooms or purchasing a do-it-yourself refinishing kit is a project that can be done in a day or two, adding appeal and value to any room.

Hardware

Changing out door hardware throughout the interior of your home, or making some changes to an external doorknob or fixture improves the look of eye level door knobs without breaking the bank.

You can buy new hardware from websites like Overstock.com for an entire home for around \$100, or new outdoor hardware for around \$50.

While it may not seem like much, the little things can add substantial value and appeal.

Light fixtures

Light fixtures come in a variety of shapes, sizes, colors and designs. Changing and updating light fixtures is another great way to give your rooms a face lift.

You can buy a single light fixture for less than \$100.

Knobs and Pulls

Nothing breathes life into a tired kitchen or bath like new knobs and pulls on drawers and cabinet faces. The best news is that this is a simple do it yourself project, completed in about an hour and requiring only a tape measure, screwdriver and power drill.

Mirrors

Dress up bathrooms with new mirrors. Wall mounted mirrors with Hollywood bulbs can seem cheap, since they are often are builder stock items. Purchase a new mirror with a cool frame, and hang it in any bathroom needing a facelift. Most large mirrors will cost between \$75 and \$100, making these cheap.
